

Week 10: Monitoring and Logging

Topics :

- Monitoring with Prometheus and Grafana.
- Logging with ELK stack and CloudWatch.
- SLAs, SLOs, and SLIs.

Assignments:

1. Set up a Prometheus-Grafana stack to:
 - Monitor application health and resource metrics.
 - Create alerts for key SLA violations.
2. Integrate ELK stack:
 - Configure Filebeat to send logs to Elasticsearch.
 - Build visualizations in Kibana for error trends.
